Tip

SPECIALTY

In order to show the details of products more clearly so that our customer can choose the product they need directly, we make 6 specialty for each series. These indexes base on the material and customers' responses. The range from level1: slight to level5: top. These specialties are only for reference, not by way of standard of the products.

This specialty shows the ability of absorbing the sweat in your sport. It's higher, your skin will feel drier when sporting.

This specialty shows the speed of heat be thrown off. You will feel cooler when this index get higher.

Your skin will more comfortable when this index get higher.

This index shows the ability of keeping the heat. Your body will get more therapeutic heat when it's higher.

This index shows the power of returning to an initial form it be stretched.

This specialty shows the ability of decompressing force acts to the product, you will not easy to be bruised when it's high.

Basic level supports supply protection and soft-tissue support for light sports by very economic cost.

Primary level supports balance the protection and free in sport. Minor pains and sprains in most kinds of sport. Also promotes healing through therapeutic heat.

Professional level supports provide maximum support to joints, and superior compression to soft-tissue.

Medical level products are mainly for first aid in sport and heal of athletic injury.

HOW TO MAKE PRODUCT WITH YOUR OWN LOGO

We usually do this by 3 ways:

Tip

Sewn-in Label

Suits for all kinds of products and cheap.

Hot Stamping

Suits for most products especially for neoprene. But if product have strong elasticity, it's easy to rip. Normal and flocking can be choosed.

Embroidery

This kinds of logo looks very solid and fashion, but cost more.

Tip

ACYLIC & TERYLENE

Acrylic and terylene are both common material used in the spinning industry. Acrylic is soft and could keep warmth very well, even as good as the wool. Terylene is very wearable and has the lower price.

MATERIAL

- Terylene
- Elastic Yarn
- Elastic Band

COLOR

- Black
- Blue
- Yellow
- White

BAMBOO CARBON+GE SERIES

Bamboo Carbon Fibre

What's Bamboo Carbon Fibre

"Black Diamond" for its excellent capability. Bamboo Carbon Fibre is made by nano bamboo carbon material, keep all characteristics of bamboo carbon.

What Bamboo Carbon Fibre do

Super Absorption

Bamboo carbon fibre's surface up to 500m² g, it's asorption 5 times to charcoal. It could inhale most harm gas and dust. Also could absorb the sweat very fast.

Emit Far Infrared Ray

Bamboo carbon also could emit a certain extent far infrared ray, so it have most of advantages of FIR supports.

Emit Anion

Bamboo carbon also could emit anions, could make body relax and reduce the tiredness. It also provide minim natural mineral for body.

Anti Static

Anti static, provide in sulation from electronic magnetic wave.

S3606 Wrist

S3607 Palm

Ge

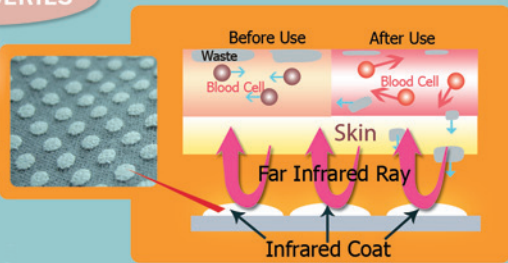

More Health? Your Body Need More Anion!

Ge is an element which can send anion when temperature up to 32°C. So when we bew powder it on the fibre, it can emit anion all the time when you wearing. More health come from more anion!

FAR INFARED RAY SERIES

S3702 Knee

What's Far Infrared Ray

The wave length between 8-12 micron is named **Far Infrared Ray**, because this kind of ray is an indispensability for life, so it also be called "Life Ray".

What Far Infrared Ray do

Advance Blood Circle

"Life Ray" can arouse the resonance of body cell, make a dilatation of capillary vessel, so that advance the blood circle. Advance blood circle not only could help the strain recovery faster, but also help rid the waste in blood vessel to be egest with the sweat.

Make Body More Oxygenous

"Life Ray" can make body's water molecule from "lazy"(H₂O) to "activate" (H₂O), the cell will get more oxygen and be more energetic.

For Sport

F.I.R support could be use as common sports support, you will get better effect of sport and it also makes pain recover faster.

For Life

Use F.I.R supports in common days will help you to keep your health and heal some chronic .
